

## VMware Horizon for Android Device Instructions:

1. Using the Play Store on your Android, search for "VMware Horizon Client" and download the app.

2. Choose "Allow" for manage phone calls and access photos, media, and files on your device.

3. Open the App and in the "Server Address" field type [view.sfasu.edu](https://view.sfasu.edu), then click "Done".

4. Login with your mySFA Credentials.

5. Choose the Admin VDI Desktop (All employees Faculty/Staff should choose Admin).

Once logged in you are presented with a desktop that includes all software that is available from SFASU standard deployment. Any additional software needed will need to be evaluated by ITS before added and can be requested through a Team Dynamix ticket at the link below:

<https://help.sfasu.edu/BDClient/2027/Portal/Requests/ServiceDet?ID=26673>.

Use the floating Navigation icon to access functionality between the touchpad to an on screen keyboard.

 <b>Navigation Icon</b> (opens navigation options below)	
 <b>Gesture Help</b> (scroll to view explanation of all gestures)	 <b>Touchpad</b> (acts as a touchpad/mouse similar to a laptop)
 <b>Basic Navigation Keys</b> (arrows, page up/down, home, CTRL)	 <b>On Screen Keyboard</b> (acts as computer keyboard)
 <b>Settings</b> (change touch/mouse/keyboard settings)	 <b>Disconnect the Session</b> (tap and confirm to disconnect VDI session)
